AIMHI

ACADEMY OF
INTERNATIONAL
MOBILE HEALTHCARE
INTEGRATION

About AIMHI

AIMHI is the nation's leading advocate for **high-performance, high-value** EMS delivery.

We champion **innovative care models, integrated mobile healthcare,** and **alternative care pathways** that **improve outcomes** and **reduce system-wide costs**.

AIMHI member agencies represent the most nimble, innovative, transparent, and data-driven EMS systems in the world — setting the standard for what's next in mobile healthcare.

Our Mission

Leading the transformation of EMS to mobile integrated healthcare through the development of high-performance systems, and setting the standard for clinical excellence, accountability, public education, research and economic efficiency.

Our Vision

To improve patient health and experience of care by promoting excellence in mobile healthcare integration through evidence-based out of hospital healthcare system effectiveness and efficiency.

About AIMHI

Membership Eligibility

- Externally reports performance measures; and
- Are authorized by local government; and
- Bills for services provided; and
- Should include, but not be limited to, the following system/agency attributes:
 - Tiered Deployment (BLS/ALS)
 - Flexible production strategy
 - Exhibits evidence-based clinical sophistication
 - Aligns with the mission and vision of AIMHI
- Any agency that operates an EMS-Based Mobile Integrated Healthcare program designed to improve patient outcomes, enhance the patient's experience of care, and reduce healthcare expenditures, defined as:
 - Uses specially trained personnel; and
 - Works as part of an organized delivery model, integrated with the local healthcare community; and
 - Are credentialed by a physician medical director; and
 - Augments the community's existing healthcare resources

POWER OF FLEET & DATA ANALYTICS

Best Practices in High Performance
Ambulance Fleet Management

What can Data & Analytics do for your fleet

- ✦ Maximize Fleet Uptime
- ✦ Controlling Fleet Costs
- ✦ Predictive Maintenance
- ✦ Vehicle Life Cycles

How to acquire vehicle data

- ✦ Vehicles are equipped with numerous computer and communication devices built into them. Using Telemetric devices, AI and Fleet software can be an excellent way to receive this information.
- ✦ By unifying, standardizing and validating this data, you can show stakeholders important information regarding the fleet.

How to deliver this information to Stakeholders

- ✿ Simplify and define the information you are trying to showcase
 - KPI
 - Monthly Dashboards
 - Specific performance measures can be shared:
 - Critical Vehicle Failures
 - Midshaft Fleet returns
 - Preventive Maintenance
 - Fuel Usage
 - Specific vehicle system concerns

Benefits of using this information

- ✦ Analytics can help predict component failures. This will allow you to shift from a reactive fleet to proactive fleet.
- ✦ This also improves compliance, controls costs and supports stakeholder buy in.
- ✦ Sharing this information with Fleet Technicians, Employees, Management and other Stakeholders will show:
 - Fleet reliability
 - Builds confidence in your customers and community
 - Strategic planning
 - Helps with funding and future needs

Maintenance in
High-Utilization EMS Fleets

Drew Morrow | Pro EMS Cambridge, MA

From Fleet Data to Fleet Decisions

The screenshot displays the RTA Fleet360 interface. At the top, there are navigation options like 'START SHIFT', 'DIRECT JOBS', 'INDIRECT JOBS', and 'START LUNCH'. The user is logged in as 'Pro EMS -Professional A... Drew Morrow'. The main content area shows details for 'Asset 11', a 2026 Ford E-450 ambulance with 6,858 miles. The asset status is 'AVAILABLE, NOT NEEDED'. Below this, there are sections for 'Repairs' and 'Parts'. The 'Parts' section contains a table with the following data:

Trans Date	WO Fac	Work Order	Posting Type	Part No	Desc	Qty	Charge Price
12/17/2025	1	0001423	Parts	PM B E450 6.8L	END-PM B E450 6.8L	1	\$0.00
12/17/2025	1	0001423	Parts	5W30S	Oil engine 5W30 S CA-15E6E1	2	\$7.001

- Predictive maintenance requires structured, repeatable data
- FMIS systems capture the full maintenance lifecycle
- Consistency turns records into decision-ready intelligence

From Work Orders to Predictive Insight

- Standardized work orders create trend visibility
- Parts usage reveals repeat failures
- Lifecycle data informs replacement and PM strategy

Predictive Maintenance Starts with Patterns

- Repeat repairs are the earliest indicator of failure
- Technician insight validates and challenges OEM PM schedules
- Trends allow intervention before downtime occurs

Predictable Maintenance

Predictive vs. Reactive Maintenance

- Predictable Cost
- Creates Predictable Readiness
- Fleet maintenance becomes a strategic financial asset

**ADVANTAGES
OF BEING A
FORD FLEET
IN-HOUSE
WARRANTY
DEALER**

- • Control your warranty timeline
- • Reduced vehicle downtime
- • Faster repairs with in-house parts
- • Direct access to Ford systems
- • Full parts & labor recovery
- • Dedicated Ford support

YOU CONTROL THE TIMELINE

- • Warranty claims handled on your schedule
- • No dealership backlog delays
- • Priority stays with fleet operations

REDUCED DOWNTIME

- • Ford & Motorcraft parts stocked in-house
- • No shipping or dealer wait times
- • Vehicles return to service faster

AUTHORIZED WARRANTY REPAIRS

- Perform warranty repairs on Ford & Motorcraft parts:
 - Brakes
 - Engines
 - Compressors
 - Alternators
 - Power steering pumps
 - Water pumps

FULL COST RECOVERY

- • Reimbursement for parts
- • Reimbursement for labor
- • Warranty work becomes revenue, not expense

DIRECT ACCESS TO FORD SYSTEMS

- • Ford PTS
- • Ford STARS
- • Ford programming software & computers

TRAINING & LOYALTY BENEFITS

- • Online Ford technician training
- • Ford Parts Loyalty Program
- • Earn points on parts purchases
- • Redeem points for tools, parts & employee programs

DEDICATED FORD SUPPORT

- • Assigned Ford representative
- • Advocacy on claims
- • Issue resolution support
- • Fleet operational backing

REAL-WORLD COST SAVINGS EXAMPLE

- Scenario: Alternator Failure – Ford Transit Fleet Vehicle

WITHOUT IN-HOUSE WARRANTY DEALER

- • Vehicle sent to dealership
- • 5–10 business day wait
- • 1–2 weeks downtime
- • \$150–\$250 per day lost productivity
- • No reimbursement

COST IMPACT WITHOUT IN-HOUSE REPAIR

- • 7 days downtime × \$200/day
- • \$1,400 indirect cost
- • \$0 labor or parts recovery

WITH IN-HOUSE WARRANTY DEALER

- • Immediate diagnosis
- • Alternator in stock
- • Claim submitted on your timeline
- • Repair completed same or next day

WARRANTY RECOVERY

- • Parts reimbursement: \$450
- • Labor reimbursement: \$350
- • Total recovered: \$800

DOWNTIME REDUCTION

- • 1 day downtime × \$200/day
- • \$200 indirect cost

BOTTOM LINE – SINGLE REPAIR

- • Downtime savings: \$1,200
- • Warranty reimbursement: \$800
- • Total advantage: \$2,000+

ANNUAL FLEET IMPACT

- • 25 vehicles
- • 2 warranty repairs per vehicle
- • 50 repairs annually
- • \$2,000 savings per repair
- • \$100,000+ annual advantage

KEY TAKEAWAY

- Being a Ford Fleet in-house warranty dealer:
 - Saves money
 - Reduces downtime
 - Keeps control inside your shop

Emergency Vehicle Life Cycle

- The cost of replacing emergency vehicles increases every year
- Over the last 2 decades the cost of new ambulances has doubled
- Rechassis cost has increased with the introduction of mandatory build specifications and equipment, reducing cost effectiveness
- Replacement cycles of 5 or 7 years (250,000-300,000 miles) are putting a strain on budgets to keep up with the capital cost

What to do!

- Learn and follow what you have heard in order to properly maintain the vehicles
- Now listen as to why this information is so important going forward

Why Ambulances do not last as long as Fire Trucks

- Fire Trucks are made on purpose built chassis from the axles and frame up with the intention of providing 15 to 20 years of service for the price
- In general, emergency vehicles are built on the same cookie cutter chassis used for every other industry to include personal vehicles
- Yet we as an industry have a belief these vehicles should be able to take on the additional daily wear, tear, idling and miles
- Add to the mix the average weight of an ambulance module or box is the same as a 20 -27 foot loaded travel trailer sitting on the chassis being towed around all day, every day

What can we do to control the life cycle

- Of course, proper preventative maintenance, the ounce of prevention is always better than the pound of cure
- Extend the replacement life from 5-7 to 8-10 years, this poses some of its own risks such as parts availability
- Rechassis with a additional year or two added, this will extend the cycle to help offset cost
- Buy “off the shelf” non custom, this can be very difficult depending on what state and what specification requirement must be met, i.e KKK-1822, GVS or NFPA
- In addition, increased training for technicians for those who have in house maintenance will give them the upper hand in finding issues when they are small before they become major expenses

Let's continue the collaboration!

AIMHI Fleet Management Committee Formation

- Share **best** practices
- Share **worst** practices & lessons learned
- Discuss issues of mutual interest
